Fairness and correct fees

Fee review

Each year, the municipality of Vimmerby conducts a fee review to ensure that families benefiting from an enrolment in preschool, after-school childcare or educational care in the municipality are paying the correct fee. It is a matter of fairness and security that all families pay the correct fee according to the established rates.

The fee review is carried out two years retroactively because information from the Swedish Tax Agency is not made available earlier. Your taxable annual income registered with the Swedish Tax Agency is compared with the information provided by you to the municipality. The fee is calculated based on all income, benefits and reimbursements for which you pay tax.

Most families already pay the correct fee and will not be affected by this review. If the review reveals that the incorrect fee has been paid, an adjustment will be made; if you have paid too much, a repayment will be made, and if you have paid too little, you will be billed the difference. Amounts less than 600 SEK are not repaid or invoiced.
